JAN. 29, SAT. 7 A.M. - BERKELEY PARK. MEET 46TH & WOLFF 1/2 DAY. RAY OLSON, LEADER.

TRIP LEADERS ARE URGED TO SEND THEIR REPORTS TO LYNN WILLCOCKSON AS SOON AS POSSIBLE AFTER THE FIELD TRIP. THESE MUST BE RECEIVED BY THE 5TH OF THE FOLLOWING MONTH TO APPEAR IN THE MONTHLY REPORT OF FIELD OBSERVATIONS.

THE 90 TOTAL SPECIES FOR THE DENVER COUNT IS A NEW HIGH. THE PREVIOUS RECORD WAS 86 IN 1956 AND 1952.

THE GLAUCOUS GULL WHILE UNUSUAL IS NOT NEW TO THE DENVER COUNT. ONE WAS REPORTED ON THE 1954 CHRISTMAS COUNT.

THE GULL WAS OBSERVED AT BOWLES LAKE AND IS A 2ND YEAR BIRD.

THIS WAS THE SECOND TIME ON THE DENVER COUNT FOR THE COMMON REDPOLL. IT FIRST WAS COUNTED IN 1961.

THE IDAHO SPRINGS COUNT PRODUCED ONE NEW SPECIES - COOPER'S HAWK.

OTHER SPECIES SEEN DURING THE CHRISTMAS COUNT PERIOD BUT NOT ON THE DENVER COUNT DAY WERE GREAT BLUE HERON, COOPER'S HAWK, BALD EAGLE AND BROWN THRASHER.

OPERATION RECOVERY IN ROCKY MOUNTAIN REGION

OPERATION RECOVERY IS THE SOMEWHAT MISLEADING
NAME OF A FALL BANDING PROJECT SPONSORED BY THE
FEDERAL BANDING OFFICE UNDER THE DIRECTION OF DR.
CHANDLER ROBBINS. IT WAS INITIATED ON THE ATLANTIC
COAST IN 1955, AND IN 1958 THROUGH THE EFFORTS OF
DR. HOWARD WILSON THE PROJECT WAS EXTENDED TO IN-
CLUDE THE ROCKY MOUNTAIN REGION.

FOUR STATIONS IN THIS REGION COOPERATED DURING
1965 IN THE STUDY OF FALL MIGRATION IN RELATION TO
PASSAGE OF WEATHER FRONTS. THEY WERE LOCATED AT
LOWER SOURIS, N. DAK. (DR. AND MRS. ROBT. GAMMELL);
CAPULIN SPRINGS AND CEDAR CREST, NEW MEX. (BARBARA
MCKNIGHT); SEDALIA, COLO. (COL. AND MRS. CHAS.
SNYDER); AND ROCKY MOUNTAIN NATIONAL PARK, ESTES
PARK; ST. VRAIN WILDLIFE REFUGE AND LYKIN'S GULCH,
LONGMONT, COLO. (ALLEGRA COLLISTER, COORDINATOR
FOR ROCKY MT. REGION).

THE FOLLOWING REPORT SUMMARIZES BANDING RESULTS
AT THE THREE COLLISTER STATIONS OPERATED DURING
56 DAYS FROM SEPT. 1 THROUGH OCT. 31, 1965.

PORTS TO LYNN WILLCOCKSON AS SOON AS
POSSIBLE AFTER THE FIELD TRIP. THESE
MUST BE RECEIVED BY THE 5TH OF THE FOLLOW-
ING MONTH TO APPEAR IN THE MONTHLY REPORT
OF FIELD OBSERVATIONS.

THE FOLLOWING INTERESTING OBSERVATIONS DURING
THE PRECEDING MONTH HAVE BEEN REPORTED:

BURROWING OWL - REPORTED BY CHARLES & MILDRED
SNYDER ON JANUARY 17, 1966 AND
FEBRUARY 4, 1966 NEAR THEIR
HOME IN AURORA. THIS GIVES
SOME VALIDITY TO THE THEORY
THAT SOME BURROWING OWLS
HIBERNATE DURING WINTER MONTHS.

WHITE-WINGED SCOTER - TWO REPORTED ON POND AT
DENVER FEDERAL CENTER.

CINNAMON TEAL - REPORTED IN BREEDING PLUMAGE
ALSO AT POND AT DENVER FEDERAL
CENTER.

BLACK BRANT - REPORTED BY DR. ALFRED BAILEY AT
DENVER MUSEUM ON FEBRUARY 6,
1966 FEEDING WITH FLOCK OF
CANADA GEESE. WAS OBSERVED BY
SEVERAL MEMBERS DURING NEXT
FEW DAYS.

THE HARLAN'S HAWKS WERE DIFFERENT BIRDS. ONE AT
VALMONT RESERVOIR WAS A VERY DARK PHASE BIRD WITH
TINGE OF RUSTY IN THE MOTTLED TAIL. UNDERPARTS
WERE TOTALLY BLACK, BUT TAIL WAS NOT BRIGHT RED
OR FREE OF BLACK MOTTLING. THE SECOND BIRD, AT
SAWHILL LAKES, HAD NO SIGN OF RUSTY IN TAIL - IT
WAS WHITISH WITH THE MOTTLING. FLIGHT FEATHERS
WERE VERY LIGHT - SO MUCH SO THAT TAIL WAS CHECKED
FOR BROAD DARKISH TERMINAL BAND OF A DARK-PHASE
ROUGH-LEG. ALL AGREED NONE WAS PRESENT. P.J.

* NOTES: April 16, White-winged Scoter continued to be observed at the Federal Center Lake.

April 30, Short-billed Marsh Wren observed by several members of the field trip to Bonny Recreation area.

April 30, SMITH'S LONGSPUR - 10 seen by George and Marie Shier on April 29, 1966 at Bonny Recreation area. One seen by Nancy Hurley on April 30, 1966 also at Bonny. This appears to be a "first record" for the state of Colorado. This species has not been listed on any current Field Check List nor has any mention been made in Birds of Colorado by A. M. Bailey and R. J. Niedrach recently published by the Denver Museum of Natural History.

A TRIP TO VIEW THE LESSER PRAIRIE CHICKEN

Following the field trip to Bonny Recreation Area, Ruth Dement and Ellen Stephenson went to S.E. Colorado to view the Lesser Prairie Chicken on its strutting grounds. From 5:00 a.m. to 8:00 a.m. on May 2, the following species were observed in an area about 8 to 10 miles east of Campo, Colorado:

Lesser Prairie Chicken	7	Loggerhead Shrike
Scaled Quail	6	Western Meadowlark
Long-billed Curlew	1	Lark Bunting
Cassin's Sparrow	50	Vesper Sparrow
Ring-necked Pheasant		Lark Sparrow
Mourning Dove		White-crowned Sparrow
Mockingbird		

When Ruth and Ellen stopped at the Forest Service office in Springfield, Colorado they learned that the strutting season was a little late this year due, the Forest Service thought, to the recent cold weather in S.E. Colorado. Usually the peak of the performance is the first week in May according to the Forest Service. Ruth Dement has a map of the area with accurate directions if you are interested in observing the Lesser Prairie Chickens.

* NOTES: April 16, White-winged Scoter continued to be observed at the Federal Center Lake.

April 30, Short-billed Marsh Wren observed by several members of the field trip to Bonny Recreation area.

April 30, SMITH'S LONGSPUR - 10 seen by George and Marie Shier on April 29, 1966 at Bonny Recreation area. One seen by Nancy Hurley on April 30, 1966 also at Bonny. This appears to be a "first record" for the state of Colorado. This species has not been listed on any current Field Check List nor has any mention been made in Birds of Colorado by A. M. Bailey and R. J. Niedrach recently published by the Denver Museum of Natural History.

A TRIP TO VIEW THE LESSER PRAIRIE CHICKEN

Following the field trip to Bonny Recreation Area, Ruth Dement and Ellen Stephenson went to S.E. Colorado to view the Lesser Prairie Chicken on its strutting grounds. From 5:00 a.m. to 8:00 a.m. on May 2, the following species were observed in an area about 8 to 10 miles east of Campo, Colorado:

Lesser Prairie Chicken	7	Loggerhead Shrike
Scaled Quail	6	Western Meadowlark
Long-billed Curlew	1	Lark Bunting
Cassin's Sparrow	50	Vesper Sparrow
Ring-necked Pheasant		Lark Sparrow
Mourning Dove		White-crowned Sparrow
Mockingbird		

When Ruth and Ellen stopped at the Forest Service office in Springfield, Colorado they learned that the strutting season was a little late this year due, the Forest Service thought, to the recent cold weather in S.E. Colorado. Usually the peak of the performance is the first week in May according to the Forest Service. Ruth Dement has a map of the area with accurate directions if you are interested in observing the Lesser Prairie Chickens.

Who saw a Chestnut-sided Warbler at Rocky Mtn. National Park on May 30 or 31, 1965? The man who saw it reported it to the assistant-chief naturalist and said he was a member of the Denver Field Ornithologists. This is a first record of this species in the National Park and we would like to put it on the park list. However, we must know the identity of the observer. Would he please write Mrs. Allegra Collister, 706 Hover Street, Longmont, Colorado.

* NOTES: June 25, Evening Grosbeak was a new species for the Rock Creek area. The bird was observed carrying nesting material.

On the June 11, trip to Nunn, Ruth Dement reports the following: "we found a Lark Bunting nest with three just hatched chicks and one egg: a Western Kingbird nest too high to see in; a Swainson's Hawk nest with one parent on and the other flying about; a shrike nest with six young, and a Ferruginous Hawk nest with one young."

OTHER FIELD OBSERVATION NOTES - Warner Reeser reports :

April 30, " about 15 miles east of Buckley Field I noted two and possibly four Sprague's Pipits. I had an excellent opportunity to watch two of these birds from close up and from an elevated position. Of particular interest to me were the striped back patterns that shows so plainly when seen from above."

May 9, " again this year noted Mountain Plover in South Park north of the Hartzel, Colorado area."

June 15, " five Chimney Swifts flying over the lower downtown area."

June 22, " three Chimney Swifts flying over lower downtown area."

ATTENTION CHRISTMAS COUNT LEADERS

Mildred Snyder would like each leader of a Christmas Count area to send to her a "running trip" of their areas: the start, the streets or highways traveled and the end. Also any comments as to where special birds can be located. She is preparing a chart (map) to give out before each count to other leaders, should there be someone leading a trip in another area than they have had before in another year. Please send this information to Mrs. Charles Snyder, 161 Del Mar Circle, Aurora, Colorado.(80010)

OPERATION RECOVERY IN ROCKY MOUNTAIN REGION

Two Colorado bird banding stations took part in the fall migration banding project sponsored by the federal banding office. Instructions this year suggested that top priority be given to ageing birds by checking skull ossification and asked that wing measurements and weights be recorded.

Allegra Collister operated from 5 to 10 banding nets for 47 days during September and October at Lykin's Gulch, eight miles west of Longmont and adjacent to the foothills. Due to the late spring freeze the many native hawthorns produced no fruit this year, resulting in a marked decline in the robin population. Such species as Cassin's Finch, House Finch, Pine Siskin, American Goldfinch and the various juncos fed on aphids which covered the branches of willows, as well on an abundant crop of weed seeds.

The following report summarizes banding results at the Lykin's Gulch station:
